Our 17 year history assures best practice in privacy, security and the ethical use of data

Privacy

- We have built our business based on privacy by design principles for the past 17 years
- Quantium has strict protocols around the receipt and storage of personal information
- All information is de-identified using an irreversible tokenisation process with no ability to re-identify individuals.

Security

- We are ISO27001 certified - internationally recognised for our ability to uphold best practice standards across information security
- We use 'bank grade' security to store and process our data
- Comply with 200+ security requirements from NAB, Woolworths and other data partners
- All partner data is held in separate restricted environments
- All access to partner data is limited to essential staff only
- Security environment and processes regularly audited by our data partners.

Ethical use of data

Applies to all facets of our work, from the initiatives we take on, the information we use and how our solutions impact individuals, organisations and society.

We all have a responsibility to use data for good

Quantium believes in using data for progress, with great care and responsibility. As such please respect the commercial in confidence nature of this document.

Executive summary

01 Task 1

The number of chip transactions increases dramatically prior to the Winter Holiday season. Seasonal promotional displays and end caps may further grow this trend.

Mainstream Young Singles & Couples are the primary value drivers of the chip category.

Young and Older Families make up 26% of chip clientele and purchase larger quantities on average.

02 Task 2

A control store was constructed to reflect the prior performance of the selected trial store.

The experimental store layout showed a statistically significant increase in revenue in two out of three trial stores, notably store 77.

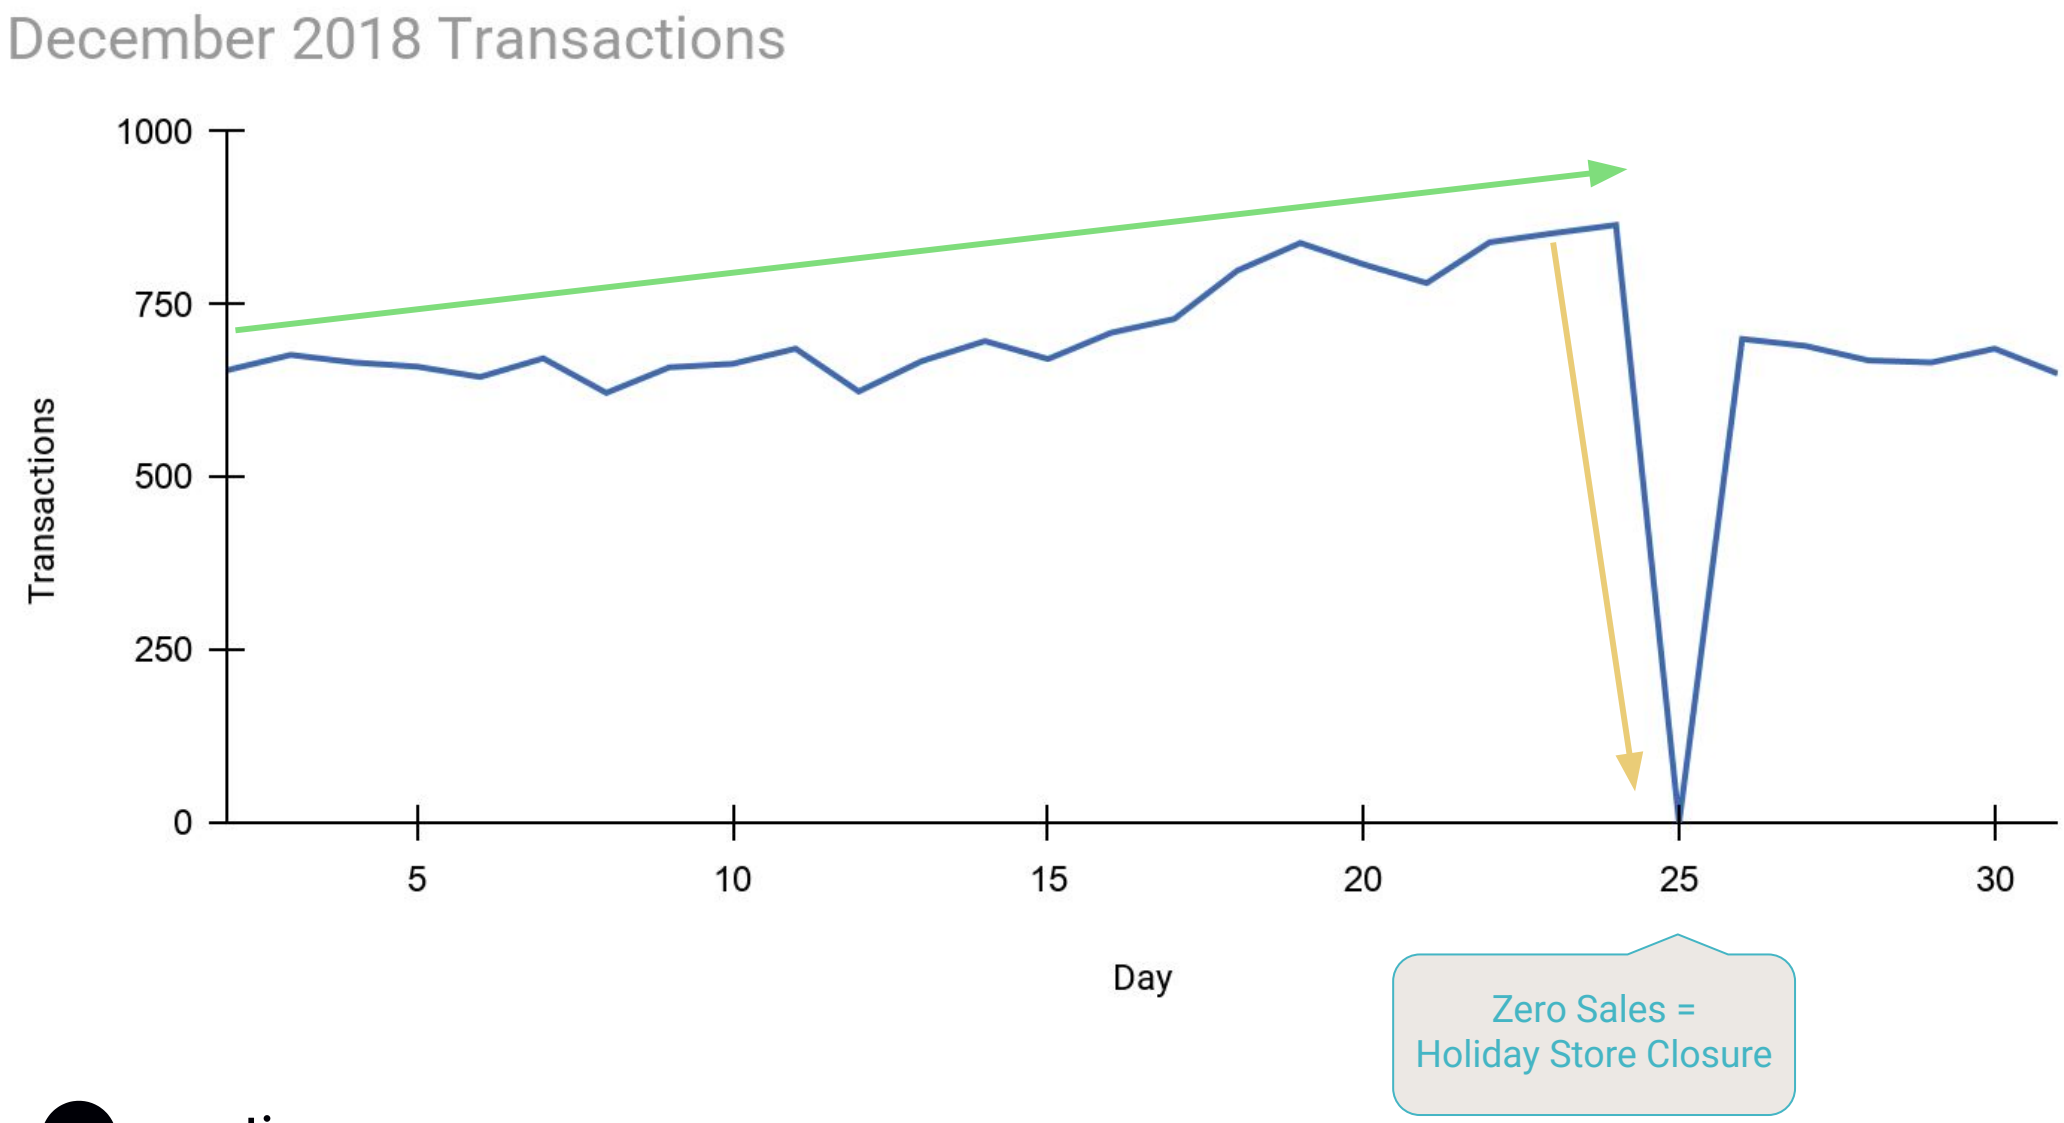
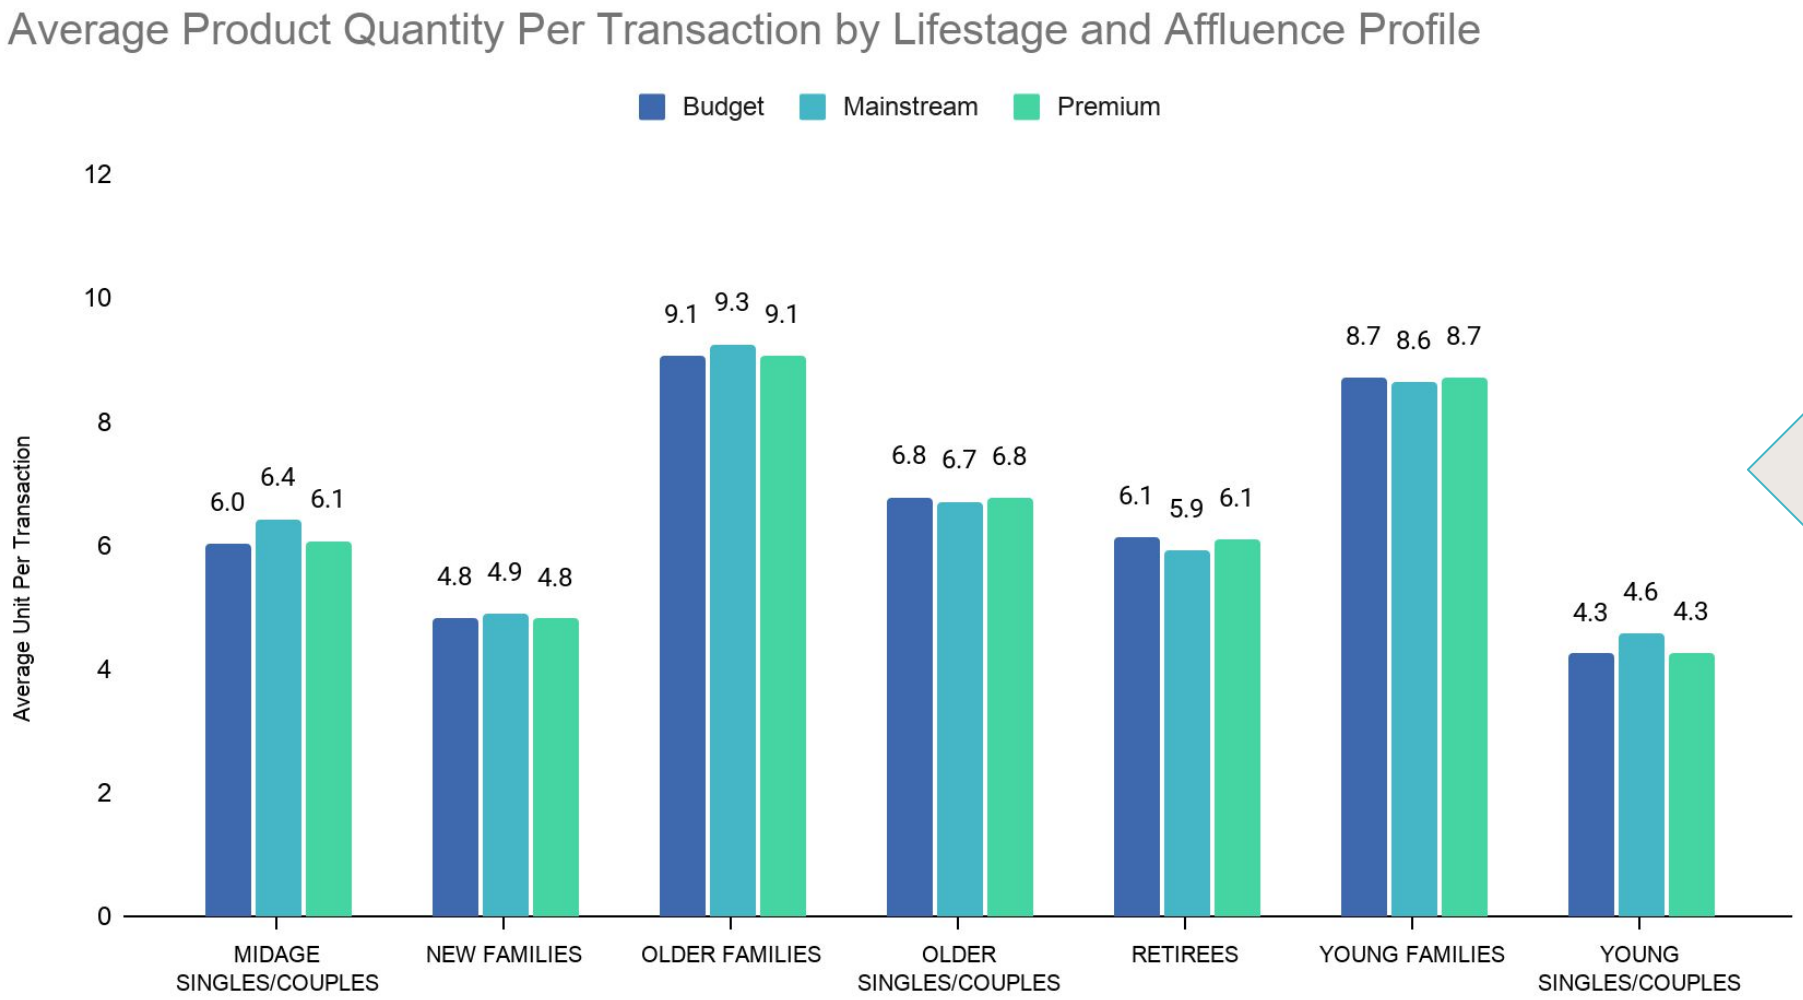
Holiday Impact



quantium

Classification: Confidential

Primary Customer Segments: Volume vs. Value



Older and Young Family segments purchase higher product quantities on average compared to other segments

quantium

Classification: Confidential

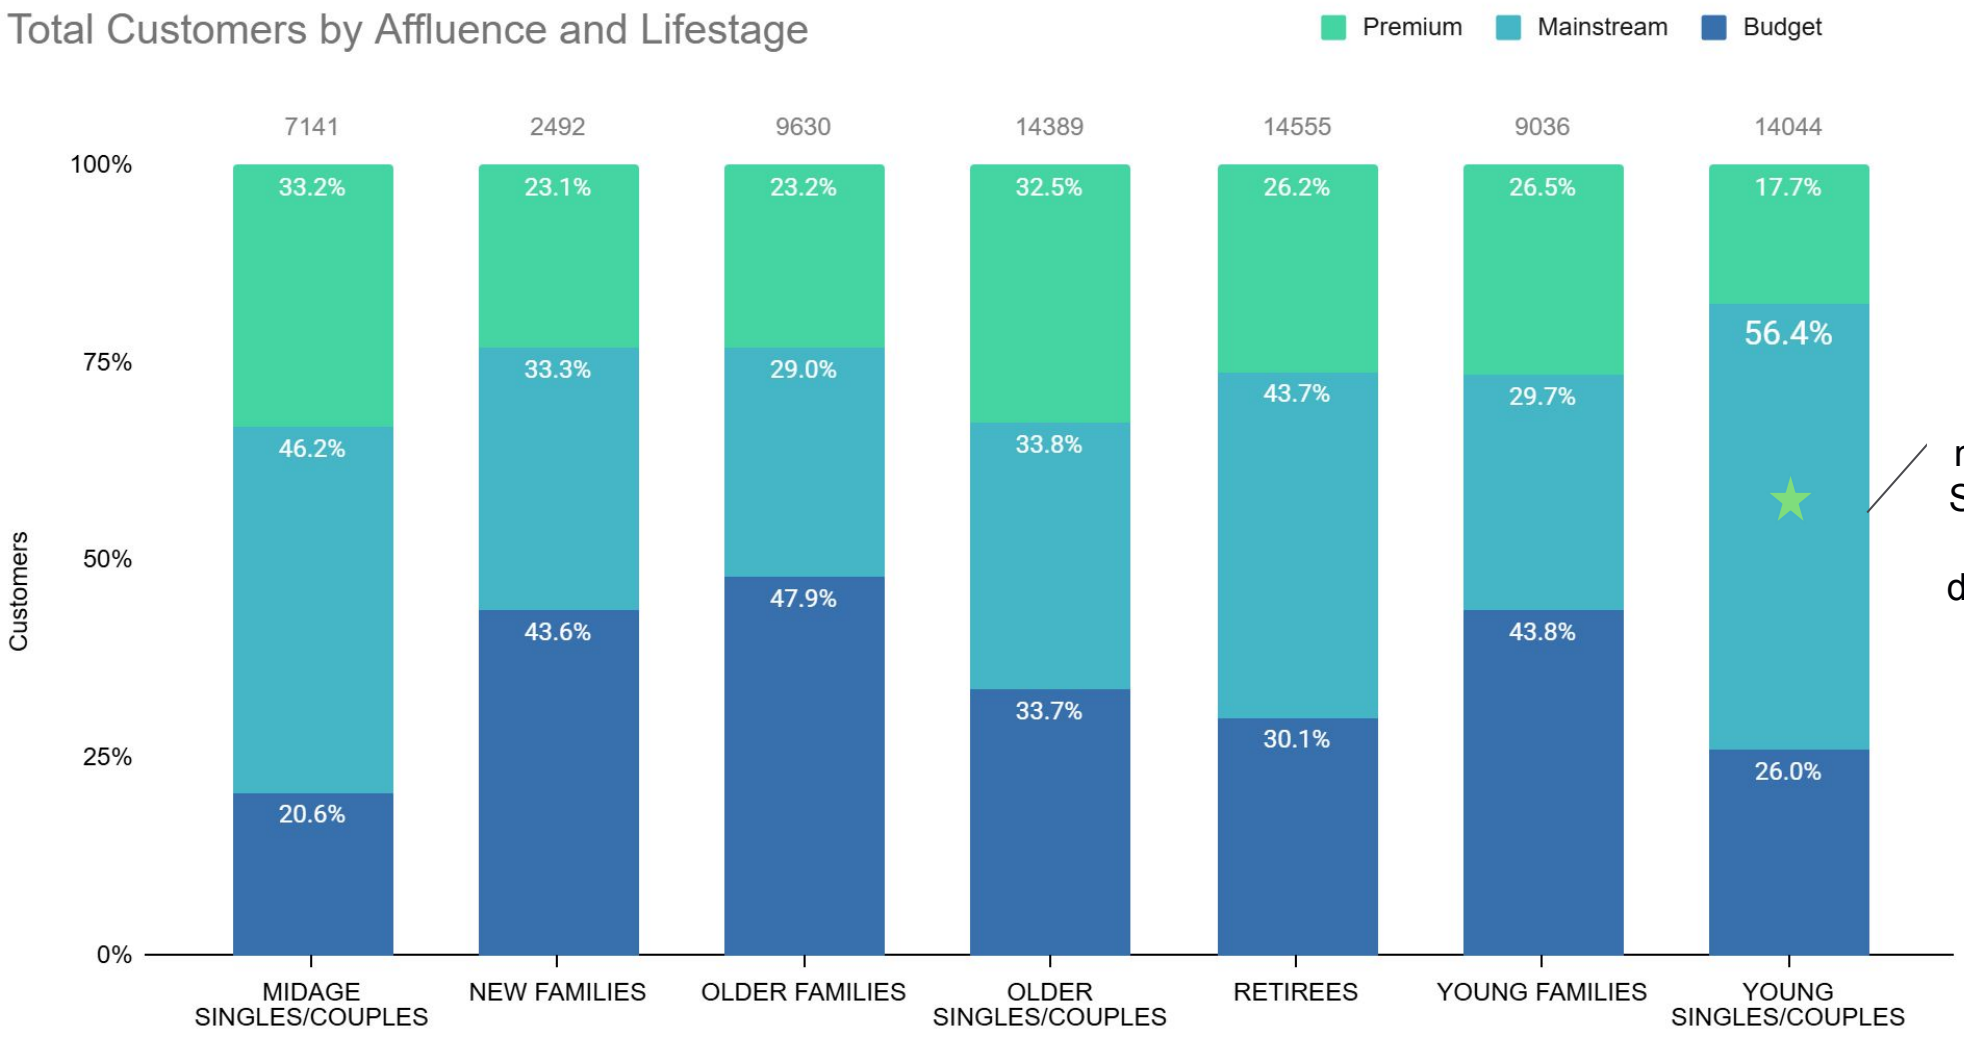
Average Price Per Unit by Lifestage and Affluence

Mainstream customers in the Mid-age and Young Singles/Couples demographics are value drivers—likely to pay a higher price per unit

quantium

Classification: Confidential

Customer Population



The bulk of Mainstream customers are Young Singles/Couples, meanwhile Mid-age Singles/Couples are not as plentiful despite generating a high revenue

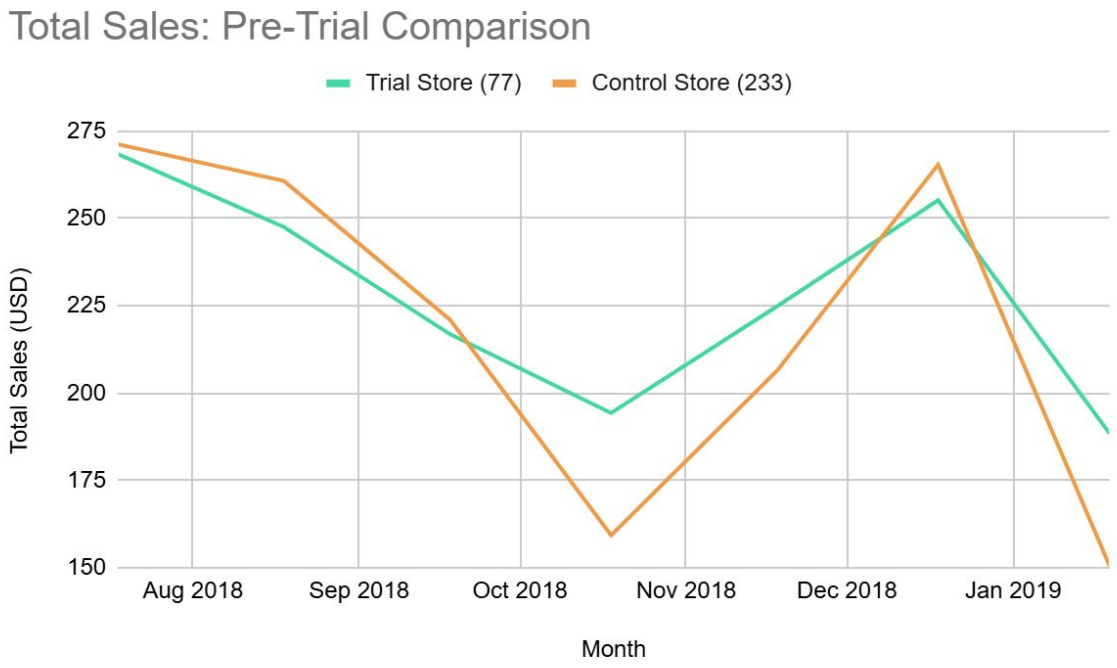
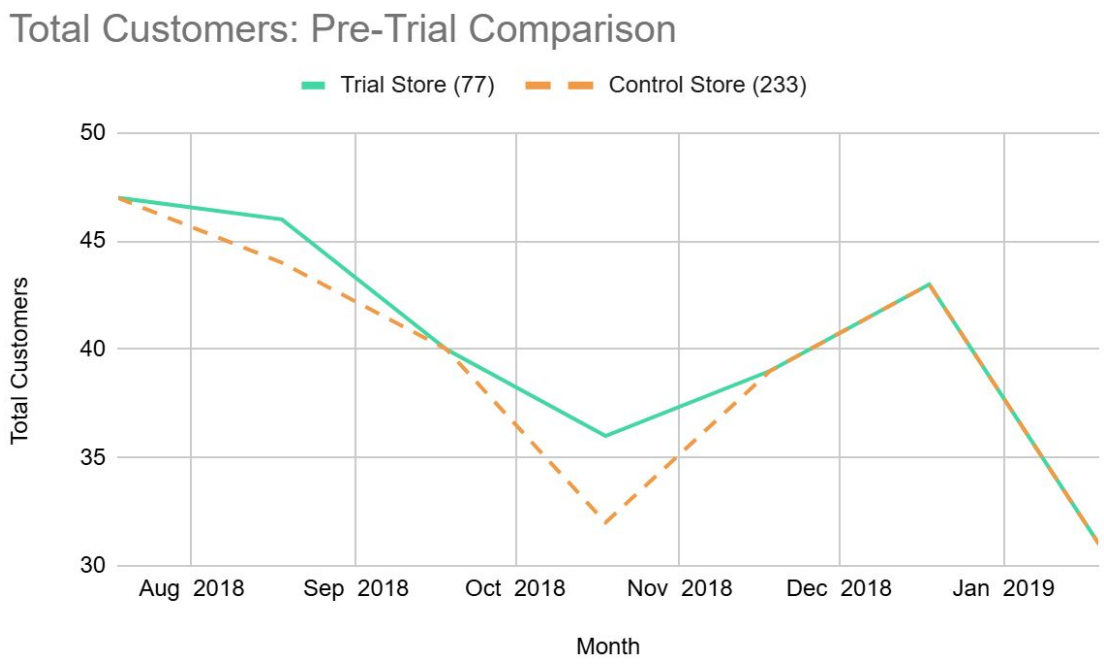
Control Store vs. Trial Store: Pre-Trial Measures



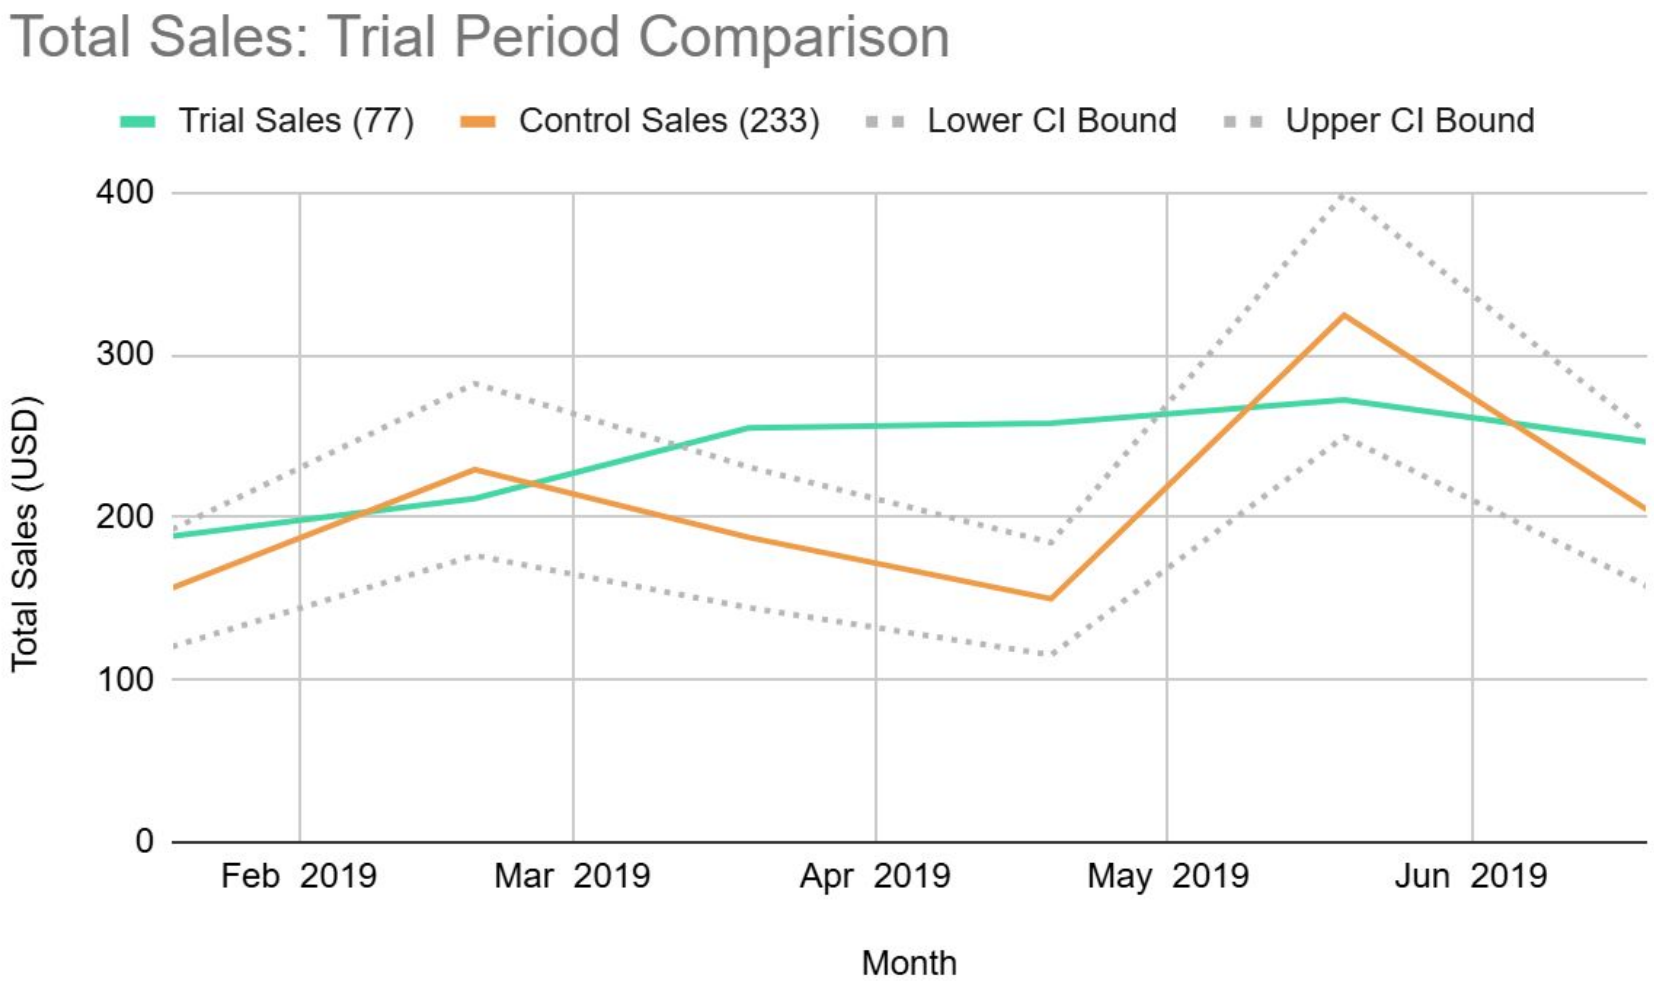


Before drawing conclusions about the success of our trial, we chose a store with similar performance to store 77 by measuring revenue and customer foot traffic trends during the pre-trial period. Store 233 was the most statistically significant “twin” of store 77.

quantium

Classification: Confidential

Trial Performance



During the trial period, store 77 saw a statistically significant uptick in revenue in two out of the three months analyzed in comparison to control 233

Recommendations & Next Steps

Expanding the Layout

Based on the significant lift in Store 77's performance, we recommend rolling out the new 'Chips' category layout to all stores in the region to maximize revenue and foot traffic, expecting that close to 2 out of 3 stores will experience a similar increase in revenue and foot traffic

Targeted Marketing

Focus promotional activity on Mainstream Young/Mid-age Singles and Couples, as they represent the highest value makeup of the Mainstream tier.

Maintain Product Variety

Continue prioritizing the 'volume' segments (families) through multi-buy offers to maintain category loyalty.
